

Blue Dragon Jet Mini

The microcable blowing machine named **BLUE DRAGON JET MINI** is designed to build last mile of FTTH network. Its simple and compact design makes it childishly easy in use. The machine blowing head is suitable and standard equipped for cables from 0,8 mm to 9,8 mm. Provided with special guiding sleeves and coupling may process fibers starting from 0.8 mm in diameter. Special hinges make the blowing head operation very quick. **BLUE DRAGON JET MINI** has no own motor, it may driven by external sources of energy, like a battery screwdriver. Using the screwdriver's overload coupling, you may accurately adjust maximal power of the roller feeder. In basic standard the machine is supplied with three sets of driving rollers that have different hardness of their rubber cladding (40; 50; 60 Shore). The machine come in very durable and good looking box. The machine can be supplied with a cable length meter.

Cable diameter [mm]	0,8 – 10	Weight [kg]	4
Duct diameter [mm]	5 – 16	Dimensions [mm]	260x150x230
Max blowing distance [m]	1000	Transport case	
Max blowing speed [m/min]	110	Dimensions [mm]	450x350x280
Max operating pressure [bar]	15	Set Weight [kg]	10
